

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THE rapid and increasing sale of this Dictionary leaving no doubt of its utility, neither trouble nor expense have been spared in this edition to deserve a continuance of the public esteem. Sensible of such decided preference, two different editors in Paris determined to profit by it. One of them, in an edition sold by Mr. Santin, copied literally this work, boldly assuming the name of the present editor. This was an injury, but not a direct insult. The other, in an edition for Mr. Theophilus Barrois, threatens with a prosecution any person who shall presume to pirate his manuscript. *Manuscript*, indeed! whoever will be at the trouble to compare the two editions, will find that editor to have been a minute copier of this present Dictionary.

As to his asseveration of being the first who inserted the several irregularities in the English verbs and nouns—nothing, to use the softest expression, was ever more groundless. He took them, word for word, from this work, in which they were inserted by the present editor more than twenty years ago, with the following paragraph in the preface:—"This edition contains all the irregularities in the English language—a convenience which is not to be found in any other French and English Dictionary."

Another paragraph was this:—"Ladies at the head of schools, and private governesses, will find their laudable wish fully satisfied, as the most scrupulous care has been taken to expunge all improper expressions." It must, however, be granted, that the copier followed here his own plan, and replaced with the strictest attention, all the rude and offensive words which the present editor had left, and continues to leave out.

As to some articles which that editor added, they chiefly consist of obsolete and uncouth expressions, which will for ever remain undisturbed, or of words minutely technical, which the present editor always avoided to insert, because a literary Dictionary can never be made an Encyclopædia: otherwise, why not have added the whole series of words belonging to chemistry, botany, painting, &c. &c.? All the chief words, either naval or military, with those of the several arts and sciences, used in general reading and conversation, are, and always were, in our Dictionary, according to the excellent plan of the French Academy and of Dr. Samuel Johnson.

We hope that this moderate defence against an injurious encroachment will not be deemed improper here; and we finish with observing, that this edition continues to have the convenience of a clear and comprehensive view of the *pronunciation*, *accidence*, and *syntax* of the French language, with a particular Section on grammar in general.

OBSERVATIONS.

I. When polysyllables are spelt alike in both languages, or are only altered at the last, or two last syllables, they will be found in the following manner: Abbreviation, *f.*—*tion*. Abominable-*ment*, *ad.*—*bly*.

II. When several words of the same part of speech follow one another, the mark of the part of speech is only put after the first word, and answers to all the others. The same method has been followed with regard to the gender of the French words.

III. When a letter, or a syllable, such as *e*, *re*, *euse*, &c. follows a French adjective, it is to show its feminine. As the adjectives ending in *e*, without accent, are always of both genders in French, they have no special mark in this Dictionary. Those that are quite irregular are printed without abbreviation.

IV. When you meet with a line thus:—, that begins a new article, it means the repetition of the preceding word, which generally has another signification.

V. When there is but one meaning to an adverb, if there be near it an adjective of the same root, and with different significations, the adverb generally has them all.—Thus *tendrement*, *ad.* has all the meaning of *tendre*, *a.* This observation, which serves for several hundred adverbs, and often for substantives, will be of great service to young translators.

VI. The frequent asterisks in the first part, show the following words to be irregular; and such irregularities are explained in the second part, in looking for those words in their alphabetical order.

AN INTRODUCTION TO THE FRENCH GRAMMAR.

BY J. OUISEAU, A. M.

We divide this Introduction into four Sections. The first exemplifies the principles of the French Pronunciation; the second treats of Grammar in general; the third presents a comprehensive view of the several Parts of Speech in the French and English languages; the fourth contains the fundamental Rules of the French Syntax.

SECTION I.

Of the French Pronunciation.

The French alphabet consists of 25 letters, in the ord. of this Dictionary: *a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, x, y, z.* They are divided, as in English, into *vowels* and *consonants*.

Some particular marks, called Accents, are essential to the orthography of the French words, and affect their sounds.

The acute accent (´) is put upon *e*, and gives it a slender and acute sound, nearly as *a* in *de, pale*. Ex. *été, bonté, générosité*.

The grave accent (`) is put chiefly upon *e*, and

gives to it an open and grave sound, nearly as *a* in *play, day*. Ex. *frère, crime, chevre*.

The circumflex accent (ˆ) is put upon any vowel, and gives to it a broad sound, just as the sound which distinguishes *hall* from *hat*, *shawl* from *shall*. Ex. *du plâtre, vous êtes, les vitres, je brûle*.

The apostrophe indicates the elision of a vowel: as *l'âme* for *la âme*; *l'arbre* for *le arbre*.

The cedilla gives to the *c* the sound of *s*, before *a, o, u*. Ex. *il langa, ma leçon, nous sommes*.

SOUNDS OF THE VOWELS.

Observe first, That the French letters *s* and *x*, when added to the substantives and adjectives to mark the plural number, serve likewise, in general, to lengthen the syllable which precedes them. Ex. *un soldat, des soldats; un effet, des effets*.

Secondly, a vowel with a circumflex, is always broad; as, *vous êtes drôle*; but vowels

Open A; sounded like *a* in *shall*

Broad A; sounded like *a* in *shawl*

Blender E; sounded like *a* in *ale*

—er, { and so sound *er, et, and*

—ez; { *ai*, in the final syllables }

—ai; { of verbs. }

Open E: nearly like *ay* in *may*

are often pronounced broad, although without a circumflex, as will appear in the following tables.

The vowels *a, e, i, o, u*, produce, by their combination with other letters, many other simple sounds, which we treat as vowels in the following order.

Bague, cave, mascarade

Plâtre, blâme, rare

Thé, café, félicité

Parler, danser, jouer

Vous parlez, dansez, jouez

J'ai, je sais, il sait

Règle, zèle, caractère

Open E, { and so sound *ai* and *ei* in
first and middle syllables; *et*
— *ai*; in final syllables; *e*, not ac-
— *ei*; cented, but followed by two
— *et*; consonants, or a final *c*, *f*, *l*,
— *oit*; *r*; *oi* in the imperfect and
conditional tenses of verbs.

Broad E; { sounded nearly like *e* in *there*;
— *ai*, *aie*; and so sound *ai*, *aie*, *ais*, *aix*;
— *ais*, *aix*; also *ois* and *oient* in the im-
— *ois*; perfect and conditional tenses
— *oient*; of verbs, likewise *ets*, *aits*, *ès*.
— *ets*, *aits*;
— *es*;

Guttural E; { at the end of monosyllables,
and in the composition of
words, is sounded like *e* in
sister.

eu, œu, { So sound nearly *eu* and *œu*—
— *eu*, likewise *eu*, *œu*, *eus*, *œus*,
— *eux*, and *euse*, but much graver.
— *eus*,
— *œus*, *euse*,

Silent E; gives a full sound to a final consonant,
which otherwise would be silent

Slender I; sounds like *ee* in *sleep*

Open O; sounded like *o* in *come*; so

— *au*; sounds *au* at the beginning and end of
polysyllables

Broad ô, O; sounded like *o* in *cold*;

— *os*, *ots*, so sound the final syllables

aux; *os*, *ots*, *aux*; likewise *au* in mono-
syllables

Slender U; these vowels have no similar

û; sound in English; û sounds like *u*,
but is a little longer

Slender OU; sounded like *oo* in *cool*

Open nasal UN, UM; no similar sound in
English

Open nasal ON, { nearly like *on* in *went*
— OM;

Broad nasal IN, something of the sound of

— *im*, *ein*, *in* as pronounced in *saint*,

— *ain*, *aim*; *pint*

Broad nasal AN, something like *an* in

— *an*, *en*, *em*, *want*, *warrant*, but still

— *ent*, *aon*, *aen*, more nasal

J'aime, vaine, grammaire

Haleine, peiné, enseigne

Bonnet, bosquet, bracelet

Toilette, sagesse, dentelle

Bec, chef, sel, enfer

Il parloît, il parleroit

N. B. Wherever *oi* has the sound of *i* or *e*
many authors change *oi* into *ai*; *vangeoi*, *le*
glais, *il parloît*, &c.

Tempête, tête, conquête

Maitre, aise, craie, futaie

Jamais, désormais, la paix

Les François, les Anglois

J'aimois, ils aimoient

Sujets, regrets, pres du pré

Sultan, tyran, chantre, rang

Ambre, chambre, vengeance, printemps, souvent

paon, faon, la ville de Caen

Saône (a river,) taon (a gad-fly,) pron. *Sône*, *ton*

N. h. 1. When after *n* or *s* follows an *e* mute in the same syllable, or another *n* or *s* with a vowel in the following syllable, the sound ceases to be nasal. Ex. *châcre, châcuns; mûlesin, mûlesin; fripon, fripons; baron, barons; point, points.*

2. *Est* is silent in the third person plural of verbs, but the preceding consonant has a very full sound. Ex. *ils sautent; ils dansent; ils parlent; ils mangent.*

N. B. The consonants *c, f, l, r*, are commonly sounded at the end of words; but the other consonants are almost always silent, unless they are joined to a final *s* mute; as *saint, sainte; prudent, prudente; Louis, Louise; Romain, Romaine; petit, petite*.

OF THE UNION OF WORDS.

The rule generally given, that a word ending with a consonant should be joined to a word beginning with a vowel, is absolutely erroneous, and leads to a heavy affected manner of pronouncing. It is true that in *reading verses*, and in *public speeches*, consonants are oftener and more strongly sounded before a vowel; either to preserve the measure of the verse, or to give a quicker impulsion to the air, and be heard at a greater distance. But in *conversation*, and in familiar reading, nothing is more carefully avoided by all unaffected people.

However, as there are many cases in which the consonants must be joined to the vowels, we shall endeavour to give a clear rule, with its modifications, for the direction of Foreigners.

1. Let us observe that the consonants *c, f, l, r*, few words excepted, are always joined to the next vowel of any word which follows them.

2. The same remark stands good for any other consonant that, by custom, is pronounced full at the end of some particular words; which for the most part are ancient and modern foreign names. Thus in the words *Vénus, Bacchus, Memphis, Abraham*, &c. the final consonants keep their full and natural sound, either before a consonant or a vowel; therefore pronounce *Vénus aimable, Vénus blessée, Bacchus endormi, Abraham obéissant*, &c. in sound-

ing fully the final consonants.

3. The verbs are never joined by unaffected speakers to the word which follows them, unless that word be their pronoun conjunctive, the indeterminate pronoun *on*, or the supplying pronouns *y* and *en*; which three last always sound before and after verbs.—Thus read *without pro-*

nouncing the final consonants of the verbs; *j'a vois envie; il parut accablé, nous parlâmes à Antoine*.—But, sound the final consonant, both of the verbs and pronouns, (according as they meet either before or after one another) in such constructions as *these*; allons *y*; m'attend-on?

Donnez-en? en-avez-vous? On-en-aura; vous aimez ma sœur; & elle vous aime. Parut-il accablé? Je ne puis qu'y faire, dit-elle.

4. However, one may sometimes sound, but always very gently, the final consonant of a verb before the infinitive *avoir* and *être*. *Il faut avoir: on doit être*.

5. The *t* of *est* and *sont* from the verb *être*, sounds before any vowel. *Il est adroit; elles sont aimables*

6. The *t* of the conjunction *et* (and) is always silent.

7. The final *n* in nasal sounds is never to be joined to the next vowel, except in these four words; *un, on, bien, rien*; and in masculine adjectives ending in *n*, when they precede their substantives beginning with a vowel; as, *mon bon ami; j'ai son argent; donne moi ton épée*.

8. *S* and *z*, joining a vowel, take the sound of *z*; *d of t; g of k; and f* the sound of *v*.

These observations being premised, we may now offer the general rule.

The final consonant of a word, (especially *n, s, t, z*, and *z*) is sounded before a vowel, whenever the first word necessarily affects the second, that is, either determines, qualifies, or modifies its signification; such as, an article and its noun a preposition and its case, &c. &c. with the exceptions above mentioned.

References to the foregoing observations and to the general rule.

Les and *mon*, as articles, modify the words *arbres* and *allée*; therefore, by the general rule, the *s* and *n* are sounded.

The *s* in *les* and *des*, and the *n* in *mon* and *ton*, are silent before the next vowels, because *les*

The words *les* and *des* show the plural number; the words *un* and *un* announce possession. *Les y* & *les en* sont d'un grand usage en François.

The pronouns *y* and *en* are of great use in French.

Vous imitez vos frères, & nous aussi, nous les imitons.

You imitate your brothers; and we also imitate them.

OF THE GUTTURAL VOWEL *e*.

The French have two *e*'s not accented, as has been already seen in the table of the vowels. One of them is always silent, and only serves (as far as relates to pronunciation) to lengthen the syllable which precedes it; as, *un grand point; une grande pointe. Un médecin; une médecine.*

The other unaccented *e* has a sound of its own, which coming from the throat, as in the English words *daughter sister*, gives to it the name of guttural *e*.

That *e* is sometimes pronounced, and sometimes not; and in this consists a great difficulty for foreigners, who always pronouncing it full, are long before they are able to follow a French conversation, and thence are inclined to believe that the French speak much faster than any other nation. The truth is, that the French, taking them in general, do not speak faster than other people, but in conversation, and in familiar reading, they drop the guttural *e*, as often as they can do it, and thus go quicker through a sentence than does a foreigner, who gives a full guttural sound to every *e* he meets with.

In this consists much of the neatness and elegance of a good French accent, and a little at

In order to apply the preceding observations, & follow the approaches, are not to be pronounced

des, mon, and ten, are taken abstractedly, and do not affect the next word with their right articles.

Here *s* is pronounced before *y* and *en*, because *les*, as article plural to *y* and *en*, determines the extent of their signification—*d* is sounded before *usage*, because *grand* qualifies *usage*.

Here the *s* of *vous* sounds before *imitez*, because it determines *imitez*, being its conjunctive pronoun. The *s* of *nous* is silent before *aussi*, because it does not affect it, but a farther word *imitons*, the conjunctive pronoun of which it is. The *s* of *les* is sounded before *imitons*, by the second paragraph of the third observation.

The *n* of *un* is sounded by the seventh observation. The *s* of *avis* is silent before *important*, because *avis* does not qualify *important*, but is qualified by it. The *t* of *important*, sounds before *avis*, because *important* affects *avis* by qualifying it.

biguity or a harsh sound: because, as says M. l'abbé d'Olivet, the French prefer an irregularity to a discordant sound.

tention to the following remarks will remove every difficulty.

When a guttural *e* ends a second syllable, it is not pronounced; and this is effected in the following manner: the first syllable joins the consonant of the second, and the *e* thus unsupported, remains silent: *Ex. Quand vous serez le même, vous me trouverez le même.*

This sentence contains thirteen syllables in prose: *Quand vous serez le même vous me trouverez le même.* In verse, *même* would be divided into two syllables.

In familiar reading, and in conversation, it only contains eight syllables: *Quand vous serez le même, vous me trouverez le même.*

Observe, 1. If the guttural *e* of the second syllable is either preceded or followed by a diphthong *e*: a vowel compounded of two letters, such as *ai, ei, ou, &c.* the *e* must then be gently heard such we mark in the following examples with an asterisk (*).

2. The consonant of an *e* guttural, cannot be joined to a syllable ending in *e* mute.

3. When you drop an *e* guttural, let the junction be very smooth, and try to avoid a jerking harsh sound.

give here some lines of which the *e*'s which

Je me rendis le jour suivant chez le Comte
d'Olivarez, avant le lever de l'aurore.

Vous deviendrez le confident de ce seigneur ;
aimerez-vous à le devenir ?

C'est ce que je ne souhaite pas du tout, et ce
que je ne souhaiterai jamais.

Je ne pus m'empêcher de rire de la sotte va-
nité de mon secrétaire, et cependant, je le lais-
sai faire.

Cette guerre devint le sujet de toutes les me-
sures de l'Espagne.

Je ne puis m' rappeler le souvenir de cette
ville, sans maudire les trois quarts et demi de
ses habitants.

« ne me plains pas de vous, répondit le bon
vieillard ; je vous la dirai même, c'est
à regret que je me vois dans la nécessité de
vous manquer de parole, & je vous conjure de
me le pardonner.

*I went the next day to the Count of Olivarez
before the rising of the sun.*

*You will become the confident of that Lord
should not you like it ?*

*It is what I do not wish at all, nor ever
shall.*

*I could not help laughing at the foolish va-
nity of my secretary, but I did not however op-
pose him*

*That war became the subject of all the mea-
sures of Spain.*

*I cannot call that town to my remembrance,
without cursing nineteen of its inhabitants out
of twenty.*

*I do not complain of you, replied the good old
man ; I even confess it to you, it is with regret I
see myself in the necessity of breaking my word
with you ; and I beg of you to forgive it to me.*

A COLLECTION OF THOSE SOUNDS

Which Foreigners find difficult to be pronounced.

Il y a plus de vignettes en Bourgogne qu'en
Bretagne. Ce procédé est ignominieux et in-
ligne d'un Espagnol. Essayez de me trouver
un petit épagneul, semblable à celui de votre
ville. Un bon pasteur veille sans cesse sur ses
ouailles.

Mettez dans ce bouillon des fenilles de caré-
uil & d'oseille, & joignez y une gousse d'ail. J'ai
passé une heure dans le Mail, à faire une partie
de quilles. Mon tailleur m'a dit que tous les
grands seigneurs étoient alors en deuil à Ver-
sailles.

Je m'amusai la veille de Noël à considérer
une vieille Bourgnignonne, qui jouoit de la vielle
tranquillement assise au soleil sur le seuil de sa
porte. Essayez de bien prononcer l'amour & la
mort ; des citrouilles & des grenouilles ; un chi-
en hargneux ; une abeille industrieuse. Ne bé-
gayez pas en disant une anguille et une aiguil-
le, égayant et égayé.

On confond souvent la simplicité avec la stu-
péfaction, & la régularité avec la singularité. La

divisibilité de la matière nous donne l'idée de
l'infinité & de l'éternité.

L'électricité étoit inconnue à l'antiquité.

La félicité accompagne plus souvent la médi-
ocrité que la supériorité.

Les armées entreront mardi en campagne.
Marchez, rustres, marchez, ne vous endormez
pas. C'est en forçant que vous deviendrez for-
geron. Formez mieux ces lettres rondes et ces
lettres bâtarde, et ne barbouillez pas tant de
papier. Mon argent a mon argent. Quant à moi
qui n'ai point d'argent, je n'ai pas besoin d'a-
gent. Prononcez les deux R des mots erreur
terreur, horreur, irrité, terrible, erroné.

Quand un cordier cordant veut accorder sa
corde.

De sa corde à corder trois cordons li accorde ;
Mais, si l'un des cordons de la corde decorde
Le cordon, decordant fait decorder la corde.

La compassion est une affection tendre. Les
satisfactions désolent cette nation. L'ambition, est
une illusion qui conduit souvent à des actions
criminelles.

ABBREVIATIONS.

<i>a.</i> Adjective	<i>p.</i> Participle	<i>v.</i> Verb
<i>ad.</i> Adverb	<i>pl.</i> Plural	<i>va.</i> Verb active
<i>c.</i> Conjunction	<i>pr.</i> Preposition	<i>v.imp.</i> Verb impersonal
<i>f.</i> Feminine	<i>pro.</i> Pronoun	<i>vn.</i> Verb neuter
<i>int.</i> Interjection	<i>s.</i> Substantive	<i>vr.</i> Verb reflected
<i>m.</i> Masculine		

. Adjectives ending in *e* mute, that is, *without an accent*, are of both Genders.

N. B. All the Words marked with an *Asterisk* (*) are irregular, either in their own nature, or by a license in orthography and pronunciation. The *parenthesis* which follows each of them, contains the *plural* of the Nouns, or the *preterite* and *participle* of the verbs. The *Semicolon*, within the parenthesis, divides the *preterite* from the *participle*; but the *Comma* points only at a variation in the same part of Speech.

EXAMPLES.

<i>pl.</i>	<i>pret.</i> <i>part.</i>
* Mouse (<i>mice</i>)	* Give (<i>gave</i> ; <i>given</i>)
<i>pret.</i> <i>part.</i>	<i>pret.</i> <i>part.</i>
* Break, (<i>broke, brake</i> ; <i>broken</i>)	* Steal (<i>stole</i> ; <i>stolen, stoln</i>)

To know whether an H is aspirated, or not, in the Second Part, consult the letter H in the First Part.
